SSU-Secure Wi-Fi Access on Mobile Android Device

1. From the main Android Menu, select settings

2. In the settings menu, navigate to “Connections”

3. In the Connections menu, tap “Wi-Fi”
4. Select SSU-Secure from the list of networks

5. When the SSU-Secure settings window appears, select the following information as seen in the image and click connect. Some options may not be available depending on your device’s OS.

- **EAP Method**: PEAP
- **Phase 2 Authentication**: MSCHAPV2
- **CA Certificate**: Unspecified
- **User Certificate**: Unspecified
- **Identity**: Seawolf ID
- **Anonymous Identity**: Leave blank
- **Password**: SSU Password
6. If you're having any difficulty connecting to the SSU-Secure network, you may need to forget it. To forget the SSU-Secure network, navigate back to the networks menu and tap and hold the SSU-Secure network. When another menu pops up, select to forget the network.
